### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 18 May 2009 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Brainerd et al. (U.S. Patent No. 5,033,563 A).

Brainerd et al. '563, as best seen in Figure 1, disclose a device for lifting and lowering a person, comprising:

an elongated member (12);

a stretcher (16);

Art Unit: 3671

at least two elongated arms (13) extending outwardly from the elongated member and engaging the stretcher, wherein each arm is coupled to the elongated member so as to prevent rotation of the engaged stretcher with respect to the elongated member;

a floor-standing frame (1); and

an attachment mechanism (5) suspending the elongated member from the floor-standing frame such that the elongated member is slidably and rotatably coupled to the floor-standing frame and substantially balances the engaged stretcher with respect to the floor-standing frame.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3671

6. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brainerd et al. (U.S. Patent No. 5,033,563 A) in view of Fernie et al. (U.S. Patent No. 6,938,285 B2).

Fernie et al. '285, as best seen in Figure 6, show a stretcher supporter comprising:

an open frame (28);

a stretcher attachment element (20) that securely attaches a stretcher (18) to the open frame;

an adjustable lifting point (combination of elements 24 and 26); and

a shiftable, rotatable column (34);

wherein the adjustable lifting point comprises a plunger mechanism (the combination of elements 34d);

wherein the adjustable lifting point is adjusted by an electrical motor (inherent to use of controls);

wherein the adjustable lifting point is controlled by a computing device (36).

Fernie et al. '285 further disclose the plunger mechanism comprising a plurality of holes arranged in series along element 34a, and further teach elements 34a and 34d being adjustably engaged (col. 6, lines 19 through 21).

With regard to claims 22 and 23, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus of Brainerd, Jr. et al. '563 such that it would include the plunger mechanism and holes of Fernie et al. '285, since the same

Art Unit: 3671

would have merely required the addition of a known element to an apparatus in a shared art and one having ordinary skill would have had a reasonable expectation of success.

***Allowable Subject Matter***

7. Claims 1 through 5 and 7 through 12 are allowed.
8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
